

FETAL PHOTO PACKAGE

Genesis OB/GYN offers you the rare opportunity to see your baby in glorious 3D/4D imaging. All of our ultrasounds are completed using the state-of-the-art GE Voluson 730 by a registered Ultrasonographer. Dr. Banias personally reviews each ultrasound and is available for questions and to discuss the ultrasound.

As a Special guest of Genesis, your very special package will

include:

- One CD Rom and VHS Tape
- Two Color Photos
- 5/6 Black and White Photos

For obstetrical patients of Dr. Banias or if the 3D/4D is done in conjunction with a medically necessary ultrasound, the cost is \$75.

Also Offering Skin Care for Your Baby!

ULTRASOUND QUESTIONS & ANSWERS

Is it safe?

Yes. Ultrasound imaging has been available since the early 1960s to evaluate pregnancies. It is actually safer than many everyday activities such as driving, eating at fast food restaurants and most sport activities. No harmful effects have ever been demonstrated.

What are the benefits of 3D/4D?

The examination is rewarding and educational. It provides a wonderful opportunity to see your new baby in real-time. It offers the opportunity for the mother and father to bond with the new family member and actually see your baby moving!

What type of training do you have?

Dr. Baniyas is a Board certified OB/GYN and is also Fellowship trained in Maternal Fetal Medicine. He has specific training in the interpreting of 3D/4D Ultrasound. Each Ultrasonographer is certified in maternal ultrasound and has received special training in 3D/4D obstetrical ultrasound.

When can I get the test performed?

We recommend that you wait until you are at least 28 to 32 weeks for the most clear pictures.

Can you tell me the sex of my baby?

Generally we can tell you the sex of your baby. We will make this determination as a part of your scan as requested. However, if you prefer to be surprised, we will offer no clues.
